History of FRONT MISSION

Two years have passed since the first "FRONT MISSION" was released in 1995. In the meantime, the "JFRONT MISSION" series has been steadily improving without stopping. Let's take a look back at the history of this series, along with a look back at the cage.

A terrific debut with a massive world and a precise system.

The time was right for the Super Nintendo Entertainment System (SNES) to reach its maturity. The release of a realistic simulation RPG with a strong military flavor by Square, the leading RPG developer at the time, was greeted with much rejoicing and a little surprise.

Back to the starting point of the "History of Battles" again.

'(FRONT MISSION 1ST)

WAP looks great in full 3D battle scenes.

The sequel to the main series was developed on the then next-generation PlayStation, and its 3D battle scenes, which take advantage of the hardware's capabilities, have been the talk of the town. The elaborate modeling of the WAP drawn in polygonal N is unrivaled and well worth a look.

Extreme Drama, Once again, goes up in flames. (FRONT MISSION 2)

03

FRONT MISSION 2

PLATFORM : PlayStation
DATE :September 25, 1997
PRICE : 6,800yen(tax not included)

CHARACTER DESIGN : YOSHITAKA AMANO SHIPMENTS : 300,000

02

What is "Gun Hazard"?

The second title in the I'FRO NT MISSION! series, which started out as a dramatic simulation RPG, is an action game. The second game, however, was an action game. The only things that remained from the first game were the name of the humanoid mobile weapon, "Vanzer," and the fact that it was set in the 2nd century, making it a unique sequel with a completely different world situation and mechanical technology.

However, the concept of setting up and equipping weapons and parts is still alive and well. The story of a mercenary soldier fighting to save his homeland from a coup d'état is also a continuation of the first game's depth and breadth. It is worth mentioning that this game is a masterpiece among games in this genre.

The Vantour is equipped with a main weapon, special weapons, shields, and other parts. The pilot can also dismount and fight.

Rim 'Sho 6 bureau-5
PRICE :1,500yenttax n^kincruded)

An ambitious work of real-time SLG adds color to the series.

[The fourth game, released the same year as "FRONT MISSION 2," was an ambitious work of real-time simulation in which movement and combat were seamless. The game design, which was quite radical for its time, is still highly regarded today, and there are many requests for a sequel.

WARGASM (FRONT MISSION ALTERNATIVE)

Chapter 1

1-995]

Edrlier^loday, an earthenjbulge broke the surface of the Pacific Ocean at approximately 12 degrees S latitude, 91 degrees W longitude^ The&rea in question has recently been experiencing a surge in undersea volcanic activity. A team of surveyors ha^beWt dispatched to conduct periodic observations of the new landmass. A team of surveyors ha^beWt dispatched to conduct periodic observations of the new landmass.

[2002].

The landmass located ,near 12 degrees b latitude, vl degrees W longitude has grown large enough to be recognized as an island, and has been officially The United Nations has been granted authority over the island's proprietary rights.

[2019].

-At a summit following the announcement of Australia's decision, leaders of the member countries voted to change the name of the Alliance to the Oceania Cooperative Union (O.C.U.). At a summit following the announcement of Australia's decision, leaders of member countries voted to change the name of the Alliance to the Oceania Cooperative Union (O.C.U.). This new name reflects the intention of the nations to work towards establishing a union framework for the coalition, originally formed in 2005. - DCN

[2020]

-U.S.N.-The United States and Canada have taken advantage of Latin America's bid for unification, and have proclaimed the birth of a new nation: the The new nation will work toward eliminating the wealth. The new nation will work toward eliminating the wealth gap between its people, while guaranteeing basic human rights for each of its citizens. Upon making this announcement, the U.S.N. will be a democratic nation, and each former country will retain the authority to govern itself as a state. Upon making this announcement, the U.S.N. withdrew from the United Nations and submitted a motion to the UN, the E.C., and the O.C.U. proposing that Huffman Island be treated as U.S.N. territory. The creation of the U.S.N. is expected to accelerate the O.C.U.*s previously announced plan to organize itself into a union of nations. New York Today

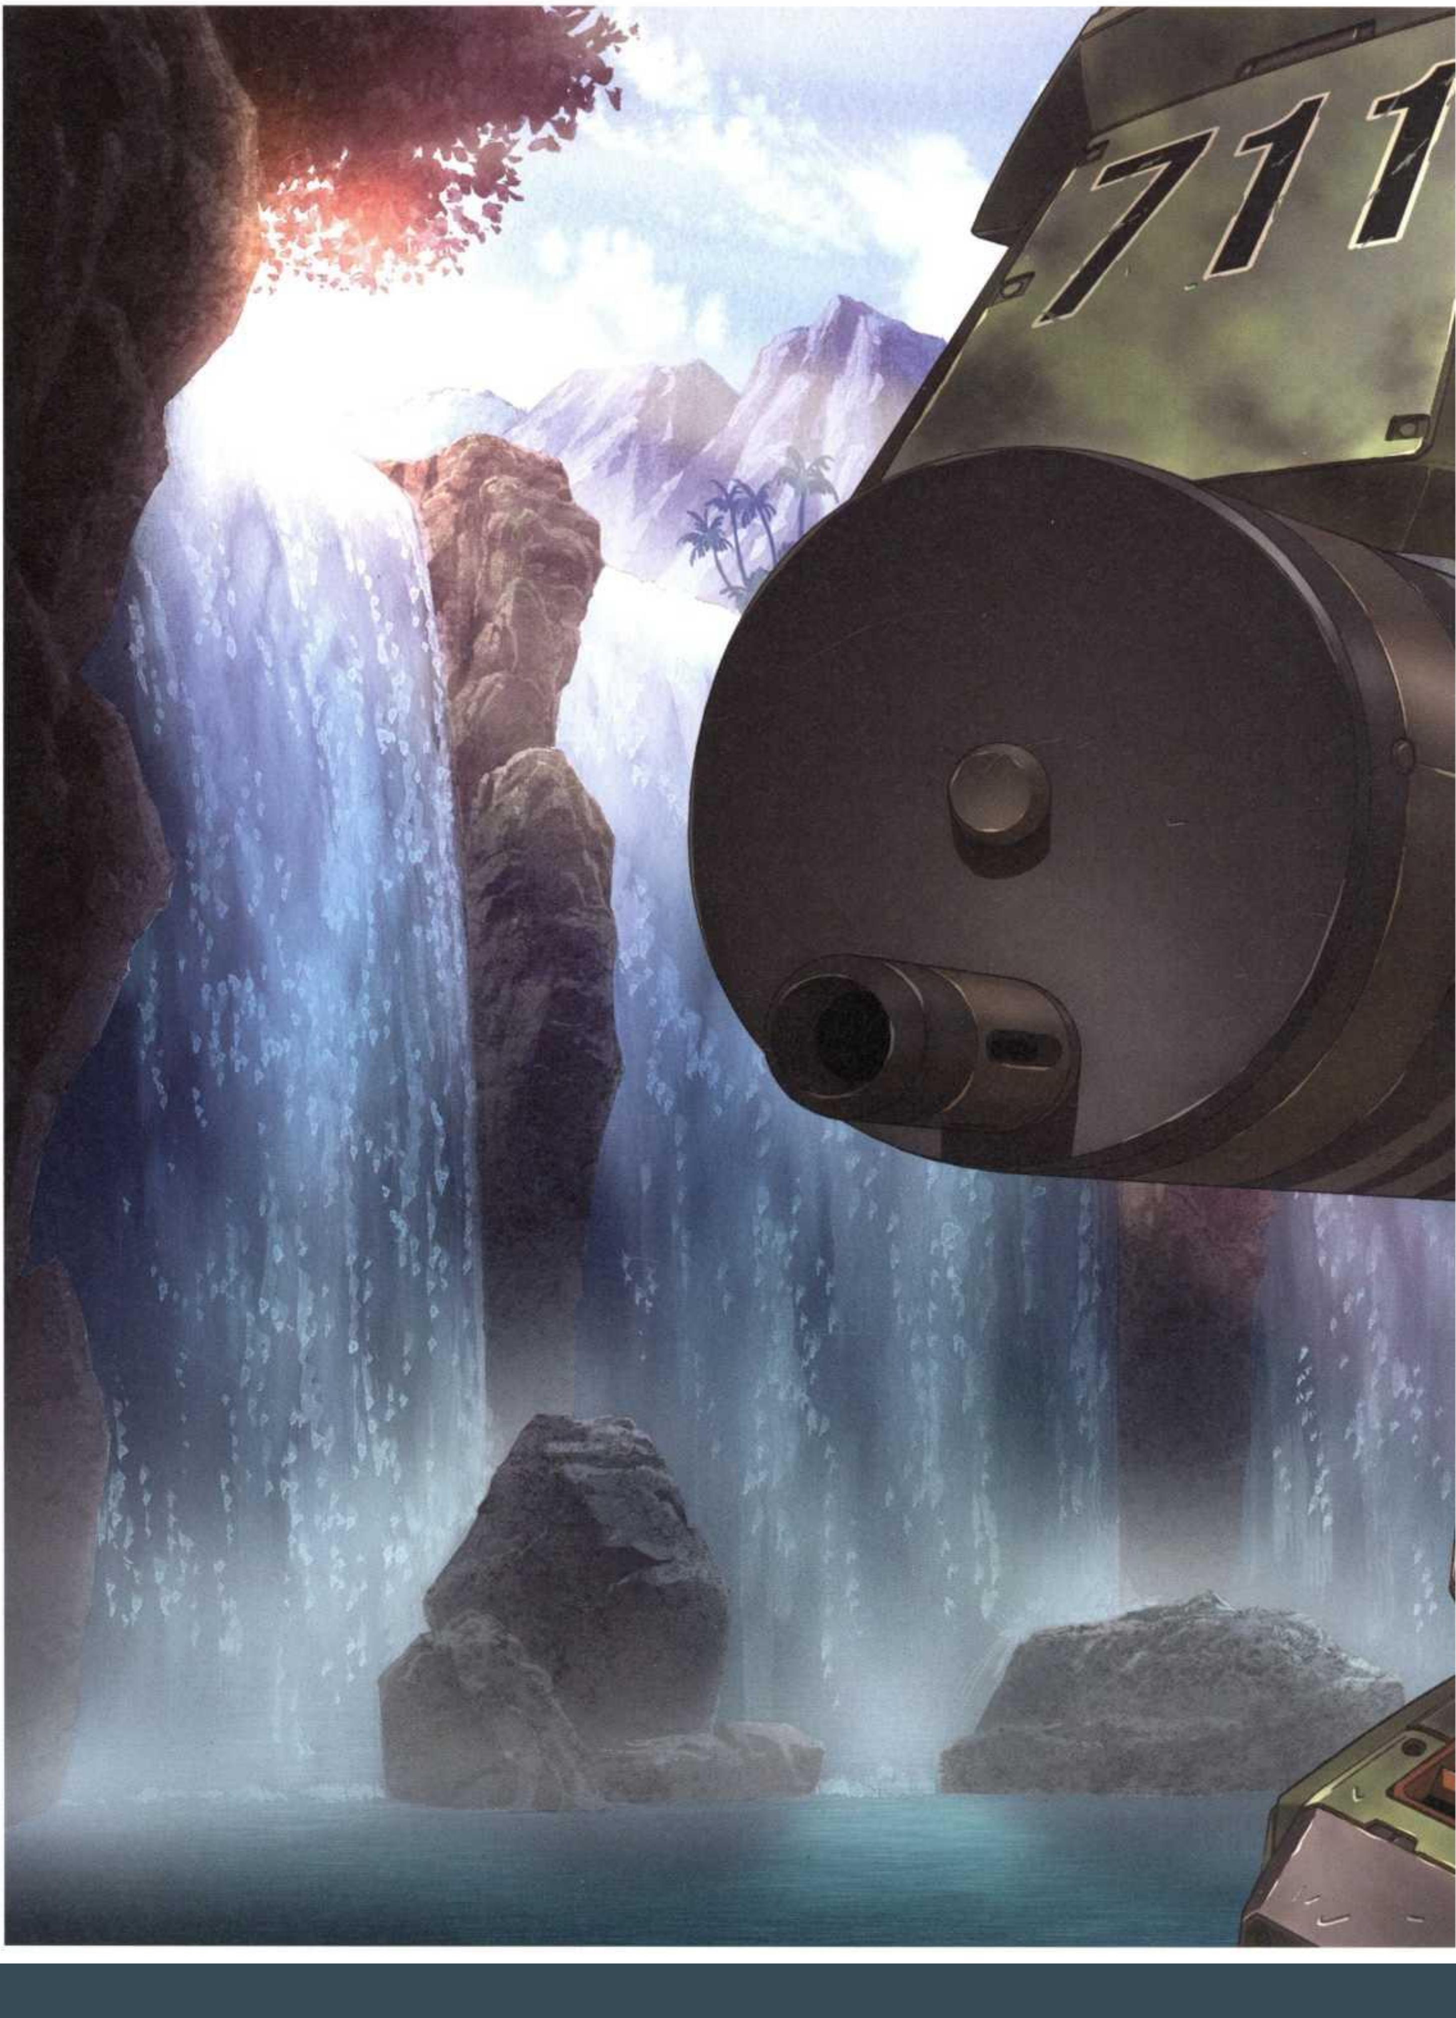

[The same year...]

The E.C.'s Schnecke Corporation today announced that it had succeeded in developing a working robotic joint actuator. The actuator's design is based on the twenty-year-old research of Dr. Landoldt, a professor of robotics at Germany's Wallenstein National University. The company held a press conference, stating that it would make use of the actuator technology to begin producing " machines to do the same work as human beings." - JBNN

[2025]

The E.C.'s Schnecke Corporation today announced its success in the production of a prototype machine capable of humanlike bipedal locomotion. According to Schnecke, the operator of the machine can perform the equivalent work of dozens of dozens of humanlike bipedal locomotion. According to Schnecke, the operator of the machine can perform the equivalent work of dozens of men. According to Schnecke, the operator of the machine can perform the equivalent work of dozens of men.

World Historica

All of the "Front Mission" series, with the exception of "Gun Hazard," are set in a common worldview and time frame. The works take place over a period of approximately 90 years, from Alt's conflict in Africa (2034) to the end of the 5 th (2121).
Here, a historical timeline integrating all the works summarizes the transition of world affairs.

society
boundary

Africa
Africa

The African continent is divided into five regions: Central, North, South, East, and West, and by the 2030s, a community of nations will be formed based on this division of the continent. At the same time, the country has been plagued by dictatorships, interstate conflicts, and civil wars. Integration mechanisms have been established to resolve problems and counter foreign economic domination, but no significant progress has been made in resolving these issues. A major conflict in 2034 will set the stage for Alt.

Ossiana Coalition
[Oceania Cooperative Union

To counter Western economic involvement, Southeast Asian countries established the Bangkok Economic Belt, which was joined by Australia and Japan to form the Oceania Community of Nations (O.C.U.). The Oceania Confederation of Nations (O.C.U.) was born with the addition of Australia and Japan, and became a major power that divided the world into two, but it also faced various problems such as economic disparity among member countries and frequent conflicts over independence. The C.U. has been involved in a large percentage of the incidents.

Euro Community
[E. C.] *European Community*

Since the end of World War II, various communities have been established to manage Europe's resources, energy, and economy. The European Community (EC) in 1967, the European Union (E.U.) in 1993, and the Eurocommunity (E.C.) in 2005. It is the most stable community in the history of the world in the Front Mission J series, with no major conflicts except for a touchdown with the U.S.N. in 2096 (the setting for the fourth series).

Central People's Republic of the Desert
People's Republic of Da Han Zhong

In 2112, the country's president was replaced by a new president, and the government shifted to an open-door policy. The country's policy of opening up to the outside world has been met with protests and instability in many parts of the country, including the formation of antigovernment organizations. In addition, the country has long been a military state and has a large military force.

South African Union of States

United States of the New Continent
[U.S.N.

The U.S.A., feeling threatened by the growing power of the E.C. and the O.C.U., joined forces with Canada to create a unified North American state. The Latin American countries sought to merge with the U.S.N., creating a giant state that would unify the Americas. The U.S.N. also appears in most of the films from the first film, but its presence as a military force is strong, and the nation itself leaves little impression.

Republic of ZAFTRA
Republic of Zaftra

A reunified state formed in 2015 from the Commonwealth of Independent States (CIS), which was formed by the countries of the former Soviet Union. It has established the Permanent Peace and Mediation Organization (PMO), claiming to take over the role of the UN, which has become a mere shadow of its former self. It made a spectacular appearance as a PMO military force in the Second Huffman War (1 ST), but its international credibility was quickly shattered when it was discovered that it was the mastermind behind the Sakata Industrii Incident. However, his international credibility was quickly destroyed when it was discovered that he was the mastermind of the Sakata Industrii affair.

! The situation has settled down to the form of a

Existence and Role of the United Nations

After World War I, the League of Nations was established under the advocacy of the United States to ensure world peace and promote international cooperation. However, the United States did not join the League of Nations. Later, Japan, Germany, and Italy withdrew from the League, and the Soviet Union was expelled from the League (which was dissolved in 1946). In 1945, after the end of World War II, the United Nations was established under the leadership of the Allied Powers (51 powers). The United Nations was established to maintain international peace and human rights, to promote friendship among nations, and to solve various problems.

Global Reorganization Movement

Birth of the Community State

After the establishment of the E.C. by the European countries in 2005, the ZAFTRA Republic, U.S.N., and O.C.U. were born one after another over the next 20 years. The world changed drastically. The basis for the formation of communities was the economic ties among countries. In particular, the emergence of the O.C.U., based on the Bangkok Economic Belt formed by Southeast Asian countries in order to break free from the situation in which they were used as the economic soil of Europe and the U.S., stirred a sense of crisis in the U.S. and prompted the formation of the U.S.N. However, economic unity is, on the contrary, vulnerable to conflicts of interest, and the economic disparity within the community has sown the seeds of discord among member countries, leading to independence conflicts and civil wars in various regions.

Rise of Huffman Island

A New Battleground

In 1995, the uplift movement was confirmed by the United Nations and the island of Huffman was placed under its control, becoming a new frontier rich in nature, unique ecosystems, and abundant underground resources. The U.S.N. and the O.C.U. began settling the island in 2065 and turned it into a tourist destination, but the goal of both countries was to seize the underground resources, and only five years later the first Huffman War broke out.

The Trinitat incident (2011)

U.S. intentions

In 2011, the U.S. Navy captured the Trinidad and Tobago, an Australian-flagged tanker sailing through the Panama Canal. The U.S. explained that the incident was caused by Australia's disregard of a cease-and-desist order, but the Australian government accused the U.S. of coercing Australia into joining the Bangkok Economic Zone. Relations between the two countries rapidly deteriorated, and Australia's accession to the Bangkok Economic Zone was encouraged.

The Road to Humanoid Mobile Weapons

Actuator Development

The history of the WAP began with a new actuator developed by Professor Landolt of E.C. Germany, which made it possible to create a "work machine that moves like a person. After the WAW was developed by Schnecke and the cost problem was solved by the unified standard (MULS), it was used for military purposes and deployed in the U.S.N. and E.C. In 2034, the O.C.U. deployed WAW units for combat in the African conflict and achieved remarkable results, and the development of WAW for the military became very active. The development of WAWs for military use quickly intensified. With the adoption of the Military Unified Standard (MULS-P), the WAP became the mainstay of military power.

Phase **1: O.C.U.** intervenes in the conflict between Zango and **C.A.**

The O.A.C. had been promoting the communalization of the regions, but dissatisfied with this, C.A. Army Colonel Zaias Chalmangima established the independent government of ZANGO, which was formed by the military wing of the former government. As Zyngo expanded its power with the support of the dictatorial military regime of Guiana, the C.A. government approached the S.A.U.S., which had ties to the O.C.U., to cooperate. IMAC launched a counterattack against the C.A., and ZAINGO was destroyed within four months of its establishment. Zaius was killed.

Phase **2**: **WALF** overthrows the Guinean regime and returns to the **O.A.C.**

The year before the Zaingo uprising, W.A., which had been operating under a provisional government, experienced a coup d'état led by General Gizenga, and the Guinean regime was born, with Gizenga's dictatorship and military rule. Former President Encomo, who fled to C.A., formed the West African Liberation Front (WALF) under the anti-Guinean slogan and has continued to resist. Since Guineana was supporting ZANGO, S.A.U.S. decided to support WALF and dispatched IMAC to WALF. Again, IMAC was active on the front lines, and WALF went on the offensive and captured the capital city of Abuja. When the WALF took control of Lagos, a military stronghold, Gizenga fled to the U.N.A.S. The Guiniana regime collapsed. Guiniana's regime collapsed and the W.A.-government was restored.

Phase **3**: **O.A.C. (S.A.U.S.)** invades **U.N.A.S.**

The U.N.A.S. and the S.A.U.S.-led O.A.C. are at odds over Gizenga's disappearance. Upon receiving information that Gizenga was trying to regain power on the Saharan frontier, the O.A.C. formed a joint coalition force to pursue Gizenga, 0 invaded U.N.A.S. territory, and took control of Kusavi. However, there were growing voices of protest within the government against the E.C.-leaning policy. The O.A.C. also began to distrust the S.A.U.S.'s aggressive invasion and shifted to the W.A.'s leadership. As a result, in January 2035, W.A. and U.N.A.S. agreed to a cease-fire and the conflict ended.

Ending Conflict: Africa Dancing with the **E.C.** and **O.C.U.**

As the conflict came to an end, the O.C.U.'s influence over the S.A.U.S. waned as the various communities joined in the movement to rebuild Africa through President Encomo's Joint Declaration of State. Although the conflict was an inevitable event in the maturation process of the community, the E.C., the 0-C.U., ZAFTRA military personnel, and the munitions industry fueled the conflict and made it bigger. E.C., in particular, planned to use the underground crater lake project to provide armed support and strengthen its control over the region. E.C. sent in special forces such as Synthemia and Zerbelsgaard. This has led Gustav Zelman to use refugees in an inhumane underground market for the black market production of WAW. Zelman also deploys the "Salishagan Rifle," a particle beam cannon developed in Zerftra, and the O.C.U. military sends IMACs to retrieve it.

First Huffman Conflict (2070-2072)

Related works: 5th

Armed struggle between two major forces

In 2070, five years after settlement began, armed conflict broke out between the O.C.U. and U.S.N. forces stationed in the area. The U.S.N. denied the use of force, saying that it was an accident caused by an operational error, but admitted that it was in a state of war following the O.C.U.'s announcement, opening the curtain for an all-out conflict.

Conclusion of the Huffman Treaty

The PMO (Republic of Zahutla), which had begun mediating the Huffman conflict, proposed that the two countries conclude a "Weapons of War Restrictions" treaty. Both countries accepted this proposal and established the Huffman Convention, which prohibits the use of nuclear, chemical, and other weapons of mass destruction that may pollute the environment, in order to protect the natural environment of Huffman Island.

Sham peace through PMO intervention

In 2072, the conflict ended with the PMO's mediation, and the cease-fire, which was seen as a concession by the O.C.U. in the face of the U.S.N.'s inferiority, was accepted by the U.S.N.-which had originally proposed dividing Huffman Island with a border near the Mail River. The U.S.N., which had previously claimed possession of the island, lost face. Even after the cease-fire, both forces remained stationed on the island, and tensions continued.

Division of Huffman Island

The border is located near the Meer River, which flows through the center of Huffman Island, and the O.C.U. occupies the western part and the U.S.N. occupies the eastern part. The areas near the border near the cities of Freedom and Peseyet evening were designated as unarmed buffer zones. Although the two militaries remain stationed in the region and continue to engage in standoffs, cross-border exchanges are flourishing on the civilian level, and the region is being developed as a tourist destination with the opening of restaurant chains, the construction of entertainment facilities, and the location of movies.

Beginning of the Huffman Conflict (5th)

2059

- The "International Net Law" is promulgated. The Internet becomes a World Net service, with national governments managing servers.

2065

- The U.S.N. reasserts its claim to Huffman Island to the O.C.U., the E.C., and the UN. Concerns grow over the O.C.U.'s disregard of this claim and the start of settlement.
- O.C.U. and U.S.N. begin to colonize Huffman Island.
- Bangladesh government requests economic assistance from O.C.U. O.C.U. approves on condition of community membership.

2068

- O.C.U. Capital Begins Construction of Large-Scale Factory in Bangladesh

2070

- Bangladesh's industrial sector rapidly developed due to the military boom caused by the Huffman Conflict.
- First Huffman Conflict erupts. The O.C.U. and U.S.N. mutually claim ownership (right of possession) of Huffman Island. Armed conflict ensues.
- Sakata Seiyaku (O.C.U. - Japan) acquires WAP manufacturer Heinemann Industrii S.A. (O.C.U. - Omastralia) and establishes Sakataikidas Liy.

2084

- The first Imaginary Number is born. (Republic of Ravnui)

2085

2086

- Huffman Crisis
  Small-scale armed clashes between the O.C.U. and the U.S.N. occur frequently near the central border of Huffman Island.

The Ups and Downs of Bangladesh

Economy at the mercy of the **O.C.U.**

In 2068, O.C.U. factories were built in Bangladesh, and two years later, the Huffman War led to a military boom that greatly expanded Bangladesh's industrial sector. However, the economy declined with the end of the war, and by 2080, O.C.U. companies had completely withdrawn from the country. Unemployment in the country becomes a serious problem. In 2094, Bangladesh formally joined the O.C.U., but in the end, it did not receive satisfactory assistance from the O.C.U., leading to a coup d'état amidst the country's poverty.

Real and imaginary numbers

Products of genetic engineering research

In the Republic of Ravneu, a state-run scientific research institute established in 2030, genetic manipulation research has been conducted under the Imaginary Number Project. In 2080, the first real number was born. Four years later, the first imaginary number was born. The products of this genetic engineering research would later trigger the "M.I.D.A.S. Incident" involving the entire world.

Huffman Crisis (2086)

Related works: 5th

Mutual acts of demonstration reignited the flames of conflict.
For almost 20 years since the end of the First Huffman War, the people of Huffman Island have lived in peace, with no notable armed conflicts. In 2086, however, the U.S.N. and the O.C.U. issued a statement condemning each other's acts of aggression, and tensions rose as the U.S.N. hinted that it would build up its military forces on Huffman Island. Fortunately, a diplomatic solution was reached and full-scale military action did not take place, but skirmishes between the two militaries became chronic and eventually led to the outbreak of the second Huffman conflict in 2090. The "Sakata Industrii Incident" was going on behind the scenes of the second conflict, and it is likely that this incident is related to the second conflict.

Larkas Incident - Fall of Freedom
On June 3, 2090, a factory in the Lakas area of U.S.N. territory exploded, killing 62 people, including civilians. The U.S.N. declared war on the O.C.U. and deployed its forces near the border. o.c.u. responded immediately and prepared for battle, but on June 10, six days after the declaration of war, the U.S.N. military launched a massive WAP paratrooping operation. The U.S.N. forces succeeded in taking control of the city of

Lark Valley bombing - stalemate

The O.C.U. forces also tried to rebuild their strength, and the two armies stopped moving in a standoff. On June 21, U.S. forces used cruise missiles to bomb Lark Valley, a small city in the Roxta Desert, without warning. The U.S. military claims that the target of the bombing was an O.C.U. military supply depot, and says that the civilian victims were base employees.

Freedom Recapture - Belchica Surprise Operation

On July 30, 2091, the O.C.U. forces launched an operation to retake Freedom. The O.C.U. forces marched directly to Peceta, and, anticipating the strong resistance of the U.S.N. forces, sent a detachment to surprise the city of Belchica. Upon receiving news of the fall of Belchica, the U.S.N. forces in Peceta withdrew to Fort Monas.

Operation Eagle Tears - End of Conflict

The O.C.U. forces, which had fallen at Peceta and Belch force, launched the "Eagle Tears" campaign against Fort Monas, the home base of the U.S.N. forces. The U.S. Army had to fight an uphill battle against the impregnable Fort Morgan, nicknamed the "Land Destroyer," but succeeded in conquering the fortress thanks to the efforts of Canyon Crow. Fort Monas also met strong resistance, and the two armies continued to engage in a war of attrition, but the two governments agreed to a PMO settlement, and a ceasefire order was issued on August 9.

E. C. Incident (2096) Related works:4th

Circumstances of the incident (year/month/day)

2096E.C., five German military bases, WAP of unknown nationality (ZAFTRA forces). Attacked and destroyed by troops.

WAP troops of unknown nationality (ZAFTRA forces) attacked the E.C. Polish resource zone. 2-year suspension of mining led to a resource crisis in the E.C.

E.C. Glaser, a German brigadier general who investigated the incident, reported to the E.C. Congress that the U.S.N. military had committed the crime. Congress publicly protests, but the U.S.N. denies all knowledge of the incident.

The U.S.N. makes a demonstration against the strong E.C. by bringing its fleet closer to Madira Island.

Braunebel, dispatched in support of Madira Island, takes over the E.C. Army's Iberian mega-float. The base launches cruise missiles at the U.S.N. fleet.

The U.S.N. fleet, hit by a missile attack, launches an invasion of Madira Island in retaliation. After taking control of the island, the invasion is halted and the U.S.N. fleet is stationed on the island.

WAP units of unknown nationality (ZAFTRA forces) attack the U.S.N. fleet. The fleet commander considers the attack to be an E.C. attack, and indicates his intention to resume the invasion, but the invasion is postponed after Durandal defeats the enemy forces.

Durandal, who was conducting his own investigation, contacted the U.S.N. fleet and submitted data that would prove the ZAFTRA military was responsible.

Durandal's findings are reported to the E.C. Congress, and the Congress confirms that the ZAFTRA military is responsible.

British troops and Durandal break through ZAFTRA's Great Wall fortress and invade the resource terminal. Brigadier General Glaser, commanding ZAFTRA forces, is captured and evidence of resource smuggling by German companies is secured.

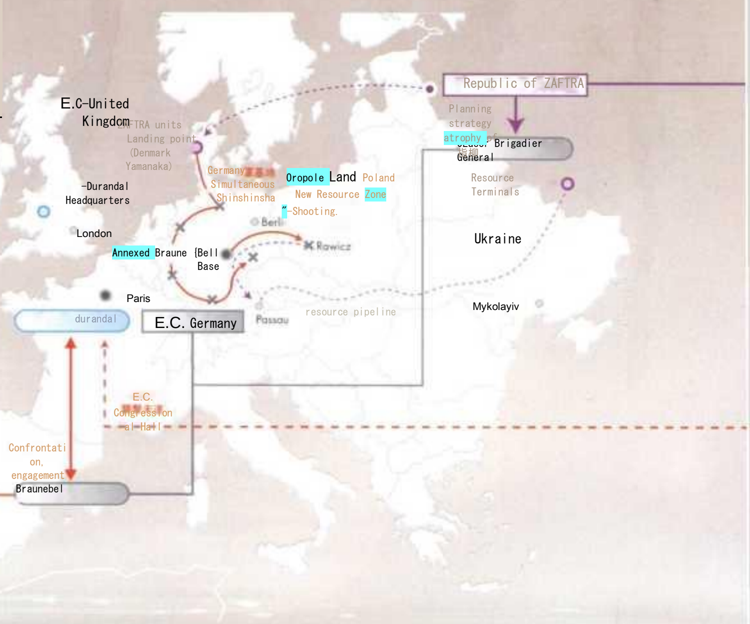

At a regular session of the E.C. Congress, Prime Minister Noland reported on the investigation. At this time, ZAFTRA troops flying from U.S.N. Venezuela approached the Congressional Hall, but were repulsed by British troops and Durandal.

Conspiracy between the ZAFTRA Republic and E.C. Germany

The series of incidents that visited E.C. were orchestrated by a spy (Captain Braunebel Wagner) sent to E.C. Germany from the Republic of ZAFTRA. Using Braunebel as a cover, ZAFTRA units were deployed throughout E.C. Germany. German Brigadier General Glaser, who had been lured by Wagner, planned the operation and took command of the actual units.

Investigation by Durandal

The person who uncovered the truth about ZAFTRA was a member of Durandal, a tactical research institute established in the same year as the incident. Although its forceful and arbitrary actions caused the E.C. Congress to distrust it, the fact that it saved the E.C. from a crisis made it possible for it to be exonerated of any violation of federal law. In this way, his position of being free from any nationalistic consciousness was effective.

;-The economy of the Republic of ZAFTRA has been in a slump in recent years. Exporting resources to E.C. for economic recovery. The E.C. was depleted of resources by a series of raids in an attempt to reopen the area. On the other hand

The E.C. and the U.S.N. were involved in the independence movement of the U.S.N. state of Venezuela.

i Part of a scheme to worsen the relationship and not primarily to support independence.

2096

;-Establishment of the new E.C-land tactical research institute "Durandal". ZAFTRA attacks E.C.F. Yidd Military Base and E.C. Polish Resource Zone U.S.N. fleet occupies Madira Islands, E.C. Territory Attempted attack on E.C. Congressional Hall by ZAFTRA forces

-U.S.N. state of Venezuela declares independence;
U.S.N. military destroys suppression forces.
-U.S.N. rebel group "Fair Venezuela" seizes power in Venezuelan state and withdraws independence.

Invasion of Madira Island (4th)

Attack on E.C. Congressional Hall (4th)

U.S.N, Venezuelan political upheaval (2096)
Related works:4th How it happened (year/month/day)

2096 U.S.N. Venezuelan state government declares independence and state troops seal the border.
U.S.N. and Army Task Forces are dispatched to suppress the situation.

U.S.N. forces invade Caracas, but are repulsed by the National Army (Zahutla forces). At this time, the rebel group "Fair Venezuela" takes advantage of the chaos to capture the governor of the state (this was not made public).

The Venezuelan state government issued a statement of its intention to fight the war (a cover-up by the ZAFTRA military).

Fair Venezuela invaded Caracas and engaged the National Guard. At this time, the governor of the state, who had been detained, ordered a cease-fire and the state forces withdrew from Caracas.

The governor of the state delivers a televised speech in which he withdraws his declaration of independence. He announces his resignation and transfers power to Fair Venezuela.

Fair Venezuela indicates that the U.S.N. military has no intention of defending against the war.

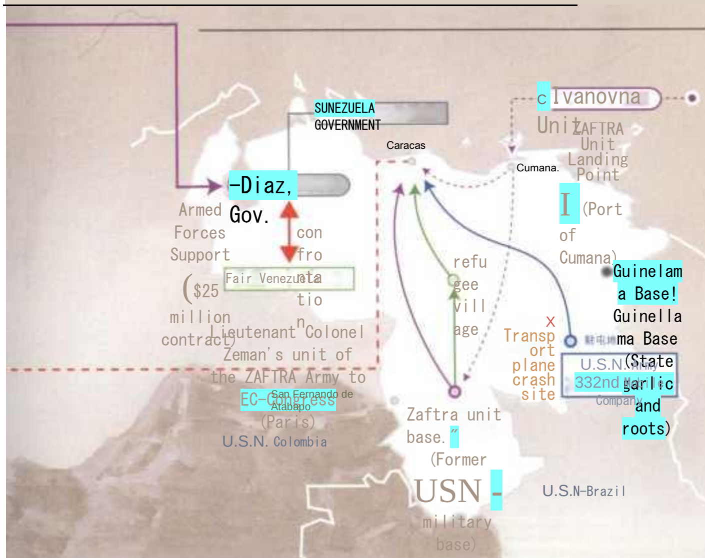

ZAFTRA troops in hiding leave the state of Venezuela and attack the E.C. and the Congress venue, but are intercepted by British troops and Durandal's garrison.

Poverty in the State of U.S.N. Venezuela

Even after the establishment of the U.S.N., many countries (states) in Latin America have been impoverished due to the lack of satisfactory economic assistance. Venezuela is one of these states[5] , and its independence is still in doubt.

The movement is supposed to be about saving the people of the state from the tyranny of the central government. In reality, however, Governor Diaz is running an oppressive regime to line his own pockets! In reality, however, the movement is rumored to be an independence movement for fear of being subjected to the U.S.N.'s collection of private funds due to the tyranny of Governor Diaz, who is trying to fatten his own pockets,

Support from state residents is remarkably low.
political change that was taken advantage of
The governor of Venezuela decided to launch a campaign for independence because he was assured of the armed support of the Republic of ZAFTRA. In exchange for $25 million, ZAFTRA sent a combat unit (commanded by Colonel Ivanovna), including large mobile weapons, to Venezuela. However, this was part of ZAFTRA's (Glazer's) plan to worsen relations between the E.C. and the U.S.N., and was not intended to support independence.

Facts and Conspiracies in the Republic of ZAFTRA uncovered

The E.C. used to rely on imports from the Republic of ZAFTRA and the U.S.N. for its resource supply, but after the discovery of a resource zone in Poland, it stopped importing resources. This was a major blow to the economy of the Republic of ZAFTRA. ZAFTRA planned to force E.C. to resume resource imports by destroying E.C.'s mining base and worsening relations with the U.S.N., the other source of resources. Glaser's self-ideology shifted the emphasis of the plan toward an open war between the E.C. and the U.S.N., but it was still beneficial to ZAFTRA.

The German special forces unit Braunebel, which served as an active unit during the E.C. Incident, was headed by Wagner and several others who were spies for the ZAFTRA (replacing the dead themselves). The red eyes, advanced fighting skills, calmness and sharpness, and idealistic image of the Zauftra are reminiscent of later imaginary numbers: the neurological research leading to B.D. and the 'interstitial modification technology, similar to genetic manipulation, being pursued in the Aivunui Republic are also aspects of the Zauftra's shadowy past. L:

Problems facing the **o.c.u.** surface

The O.C.U. had a problem of economic disparity among member countries, and poverty was spreading in Southeast Asia. In 2097, Cambodia and Laos declared an independent union and announced their intention to withdraw from the O.C.U. The central government refused and imposed economic sanctions on both countries. The central government refused and imposed economic sanctions on both countries.

Largest armed conflict since the Huffman conflict

The Independence Alliance, which sought assistance from its neighbors, resolved to introduce capital into the country and amended its internal security regulations. In response, the central government of the O.C.U. asserted its right to defend itself, and took a strong action. The O.C.U. was in an overwhelmingly favorable situation, as the Independence Alliance did not have a large military, but the U.S.N. intervened. The U.S.N. intervened, expressed its support for the Independence Alliance, and concentrated about 40% of its fleet stationed in the Pacific Ocean area in the South China Sea. Although there were signs of an all-out war, the first since the Huffman War, there were no major clashes after Cambodia's borders were restored, and a truce was called about eight months after the war began. U.S. forces remain stationed in Cambodia.

Shadow of the terrorist organization "Grimnir".

Since the conflict, the Grimnir organization has appeared in Cambodia. The details of the organization are unknown, as there is no statement of purpose or political philosophy. The organization is headed by Morgan Bernard, once known as the authority on neurology, who was forced out of the medical profession for publishing the basic theory of s-type devices.

Mor Gunn-Bernardo (5th)

O.C.U.7[7] Kuch Rudesh Army Attempted Coup (2098)

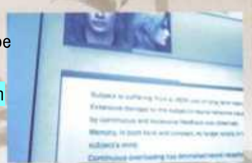

Failure of the **First** Coup

In 2094, Bankradesh joined the O.C.U. in search of economic aid, and in 2094, the country was renamed the People's Republic of Aroldesh. The country was renamed the People's Republic of Aroldesh, but it did not receive the aid from the central government that it had hoped for, and the country's industries continued to suffer. In 2098, four years after joining, there was a coup attempt in the Aroldesh military, but it ended in the murder of its leader, Colonel Azad.

This coup attempt was part of the "Fenrir Plan," which was later revealed. Although the attempted coup was part of the "Fenrir Plan," the people's dissatisfaction with the central government, which seemed to be trying to eat the country alive rather than provide assistance, was growing by the day, and the desire for independence from the O.C.U. became the groundwork for the second coup in 2102.

B.D. Research Hiding in Cambodia

The U.S. Army's special armored detachment, the Barghest, was organized as a counterterrorism unit, but its main purpose was to investigate Grimnir and Dr. Morgan. After discovering the presence of Grimnir's WAP manufacturing plant and a new device laboratory in Cambodia, Strike Wyverns stationed in Cambodia in 2098, after the Cambodian War, took control of a medical company's research facility. In 2098, after the Cambodian War, Strike Wyverns, stationed in Cambodia, took control of a medical company's research facility and discovered the existence of experimental machines equipped with s-type devices. This shows that military B.D. research, which was supposed to have been frozen after the Huffman Conflict, had been continued independently by Dr. Morgan.

	6/21	A Revolutionary Army convoy receiving supplies from Interagene on a tributary of the Brahmavutra River is destroyed in a Bergshomiti attack.
	6/23	The Dian airbase is attacked by the Bergschomiti. Maccargilles kills General Guianda, who was in contact with Interagene, and escapes with the rest of his troops due to differences in revolutionary ideals. Fenrir is transferred to the Intergae factory by Henschel.
	6/24	Intergaeen successfully launches Fenrir. Remote control of the unmanned mobile weapon is initiated
	6/26	Bergshomity enters the Intergae factory (Henschel is killed in the battle). The rocket in the factory is launched and succeeds in destroying Fenrir.

orchestrated coup d'état

The coup d'état in Aroldesh in 2102 was masterminded by Army Lieutenant Colonel Ven McCarger, but in reality it was orchestrated by General Guianda, commander-in-chief of the Aroldesh Army, in collaboration with Intergene, a secret weapons development factory of the O.C.U. The two sides had no idea of independence for Aroldesh. The two sides had no idea of Aroldesh's independence, but rather an armed uprising based on Intergaeen's "Fenrir Plan" in pursuit of military chaos.

Development plan with Aroldesh as the test site

Intergaeen is the name given to the development project of the o.c.u.'s ring-guided control device "Buenrir," which does not take the form of a company or institution. 2092 saw the bankruptcy of a weapons development company of the same name in E.C. Germany, but the connection is unclear. Intergaeen chooses Aroldesch, with its unstable internal situation, as a testing ground for Fenrir and provokes a coup d'etat. The plan was to demonstrate the effectiveness of Fenrir by launching an unmanned guided weapon to battle manned weapons in the midst of military chaos. Fenrir was in fact launched, and it has caused global chaos by hijacking the military satellites of various countries.

O.C.U.Philipino Civil War (2106-2112)

Related works:. Background of the Dispute

	third (Year/Month/Day)
2106	President Lacan and Second Vice President Bamarram confront each other over independence from the O.C.U. The Philippine Liberal Party (PLP) J, headed by Vice President Bamarram, rises in arms and occupies Mindanao. The Philippine Liberal Party (PLP) J, led by Vice President Bamaram, rises in arms and occupies Mindanao, but is unable to take aggressive action due to a chronic shortage of troops, and a lull ensues.
2112 11/8	Mercenary forces of Dahanzhong agents cooperating with the PLP raid and take control of a Philippine military missile base on the island of Panay.
11/8	PLP main force invades Negros Island and takes control of Negros Fortress.
11/10	Dagato-Ahas, a sea mobile fortress of the Philippine fleet returning from the Nansha Islands to the waters off Batangas, is attacked and neutralized by PLP mercenary troops. At the same time, the PLP main force invaded Mindoro Island.
11/13	PLP mercenary troops invade the Thar base. At the same time, the F.LA.0 6847th Execution Force (Purple Haze) raids the base.
11/13	PLP invades Batangas, M.LD.A.S. is dropped on the Dahanjung Landing Fleet, PLP forces and Dahanjung Fleet are destroyed, and PLP leader Bamaram is killed.

Conflict over independence from the **O.C.U.**
In 2106, Vice President Bamarram, who called for an immediate independence movement, was confronted by President Lacan, who said independence was premature. Vice President Bamarram formed the Philippine Liberal Party (PLP) and rose in arms. Both sides share the same desire for independence, but clash over differences in methodology.
Spontaneous Convergence due to **PLP** Destruction
The PLP, with the support of Dahanzhong, which had clashed with the Philippines over the ownership of the Nansha Islands, launched an aggressive invasion in 2112. The O.C.U. and U.S.N. also intervened with the 7ILP over the M.L.D.A.S., and with the PLP decimated, the independence conflict faded away. The PLP was decimated, and the independence dispute faded away.

The Japanese Defense Force Coup Incident 42) Related works: 3rd

Background of (Emma ed.) (year/month/day)

2112 11/18	A coup d'etat centering on the Army occurred. The Nichibo forces reported that Army Colonel Takemura was the mastermind of the coup and that some of the Army, Navy, and Air Force were involved, but in reality, Army Chief of Staff Sasaki was the mastermind and most of the Nichibo forces participated. The Nichibo forces began to exterminate the anti-Sasaki faction forces in what they called a "suppression operation.
	Colonel Takemura summons troops from Kumamoto, Miyazaki, and Kagoshima to Sasebo Air Base to unite the anti-Sasaki faction in central and southern Kyushu.
11/27	A Japanese Defense Navy destroyer detained one landing craft of the Dahanzhong Army that had entered territorial waters. Make port at Sasebo Air Base.
	Sensing the change of heart of the Sasebo base commander, Colonel Takemura ordered the troops he had called up to disband and return to the base. Immediately thereafter, he is taken into custody.
	A squad of mercenaries under the command of Adjutant Takiguchi, which had evacuated to the Tara-dake weather station, was attacked by a mobile assault group, but was repulsed.
	The Takiguchi mercenary unit joins up with the 8th Kumamoto Division at Mt. The mercenaries intercepted an attack by the Fukuoka 4th Division, and the 8th Division returned to the Kumamoto base.
	Units from Miyazaki and Kagoshima began massing in Kumamoto. Sasaki's faction surprised Saga's units and the Mobile Assault Group, but their plan was read and they were repulsed.
	Sasaki faction reorganizes units in Fukuoka, Kurume, and Sasebo and invades Kumamoto. Intercepted and withdrawn by the 8th Division at the foot of Mt. Aso and Route 208 near Omuta City.
11/30	The Chinese Army of the Great Han Dynasty begins its invasion of Japan. The Sasaki faction dispatches Colonel Takemura to demand a ceasefire. Commander Taniyama of Kumamoto base accepts the ceasefire and the coup d'etat is ended.

Background of the case (Alisa) (year/month/day)

2112 11/18 Coup d'état by the Japanese Defense Forces. Army Chief of Staff Sasaki takes the lead and occupies the capital. Calls for participation in the coup were made to all regions, and bases that did not respond were suppressed.	
The Mobile Assault Group and the Imaginary Number Unit attacked the Kaita Army base. After that, the Kaita base was destroyed by cruise missile bombardment.	
Army Colonel Takemura decides anti-coup forces at Kure Naval Base cause	
Mercenary troops of the anti-coup forces invaded the base of the coup forces (chemical plant) in Nagoya City and rescued Commander Isogai of the Moriyama base, who was being detained (Isogai remained neutral).	
Kure Naval Unit and Sendai 6th Decoration Group joined forces. The coup d'etat forces were joined by the Somagahara 6th Advance 12 Division to Koriyama.	
The 12th Division opens its surrender c and joins the anti-coup forces due to the attack of the anti-coup forces.	Soumagahara base (base of operations of the
Mercenary troops rescue the prime minister from confinement at a sanatorium in Chiba Prefecture.	
The Prime Minister issues a statement. Politicians of the coup d'etat faction turn against Sasaki and arrest him. The Mobile Assault Group declares the revolution continues and rallies.	The ringleader, he's headed to Kyushu.
11/30 The capital is liberated and the JVP coup is over.	
The anti-coup mercenaries engage and destroy a mobile assault group at the Kirishima Heavy Industries mobile weapons testing site at the foot of Mt. Aso.

The ambitions of each nation flipping **M.LD.A.S.**

The U.S.N., having taken notice of the gold nuclear theory published in Ravnui, began research in the Special Radiation Research Group, taking into account the military conversion of the new energy system. Although Dr. Kramskoy failed to defect, the U.S.N. was able to secure Emil, who understood the theory, and the development of M.LD.A.S. began in earnest. The O.C.U. and Daehanjung explored U.S.N. research and moved to seize the M.L.D.A.S. as soon as it was developed as a new type of bomb. The objective of each country was simple and clear. They just wanted immediate power to control the world.

Three **M.LD.A.S.** exploded.

The M.LD.A.S. developed at the Alaska laboratory was a single unit, but the O.C.U. Japan, which had taken it, immediately manufactured two copies at Yokosuka Air Base. This copy production was kept secret from the O.C.U. central government, which provided a copy of "Target A" for the M.L.D.A.S. transfer request. After "Target A" and the researcher were transferred to O.C.U. Philippines, "Target B" exploded at Yokosuka Air Base. This was a camouflage to make the intelligence services of other countries believe that the only copy had been lost in a misdirected bombing. After "Target A" was dropped in the Philippines, the original was moved to Okinawa Maritime City at the request of the Research Department, and preparations were made to conduct detonation tests.

The Truth About the Japanese Defense Force Coup

The coup d'etat of the Japanese Defense Forces was initially reported to have been masterminded by Colonel Takemura. In fact, Chief of Staff Sasaki was the mastermind, and Lecave, who had arrived in Japan from Daikanzhong, led the Imaginary Number Unit in cooperation with him. The main purpose of the coup was to improve Japan's position, but it seems that only Major Kuroi of the Situation Countermeasures Section was working with firm conviction. The politicians who joined the coup d'etat were only concerned with their own interests and self-preservation. It was also Lukav who encouraged Chief of Staff Sasaki to instigate the coup d'etat, with the goal of securing the original M.L.D.A.S.

Close connection between Imaginary Number and **M.LD.A.S.**

Emile, "Mother of M.L.D.A.S.," was a rare success story of the imaginary number researched and developed in the Republic of Ravneu, along with Aliciana, who, as Arisa Takemura, had shown success in radiation research at a Japanese university. She was fostered by Mr. and Mrs. Kramskoy, who later proposed the Golden Nucleus theory, and probably had a special program on radiation theory. Emma was three years old when Dr. Roland published his theory in the year of Aliciana's birth. M.L.D.A.S. could not be manufactured and controlled without them, and Luka, who is also an Imaginary Number, was determined to secure them.

I Emma Spoon and Alisa (3rd)

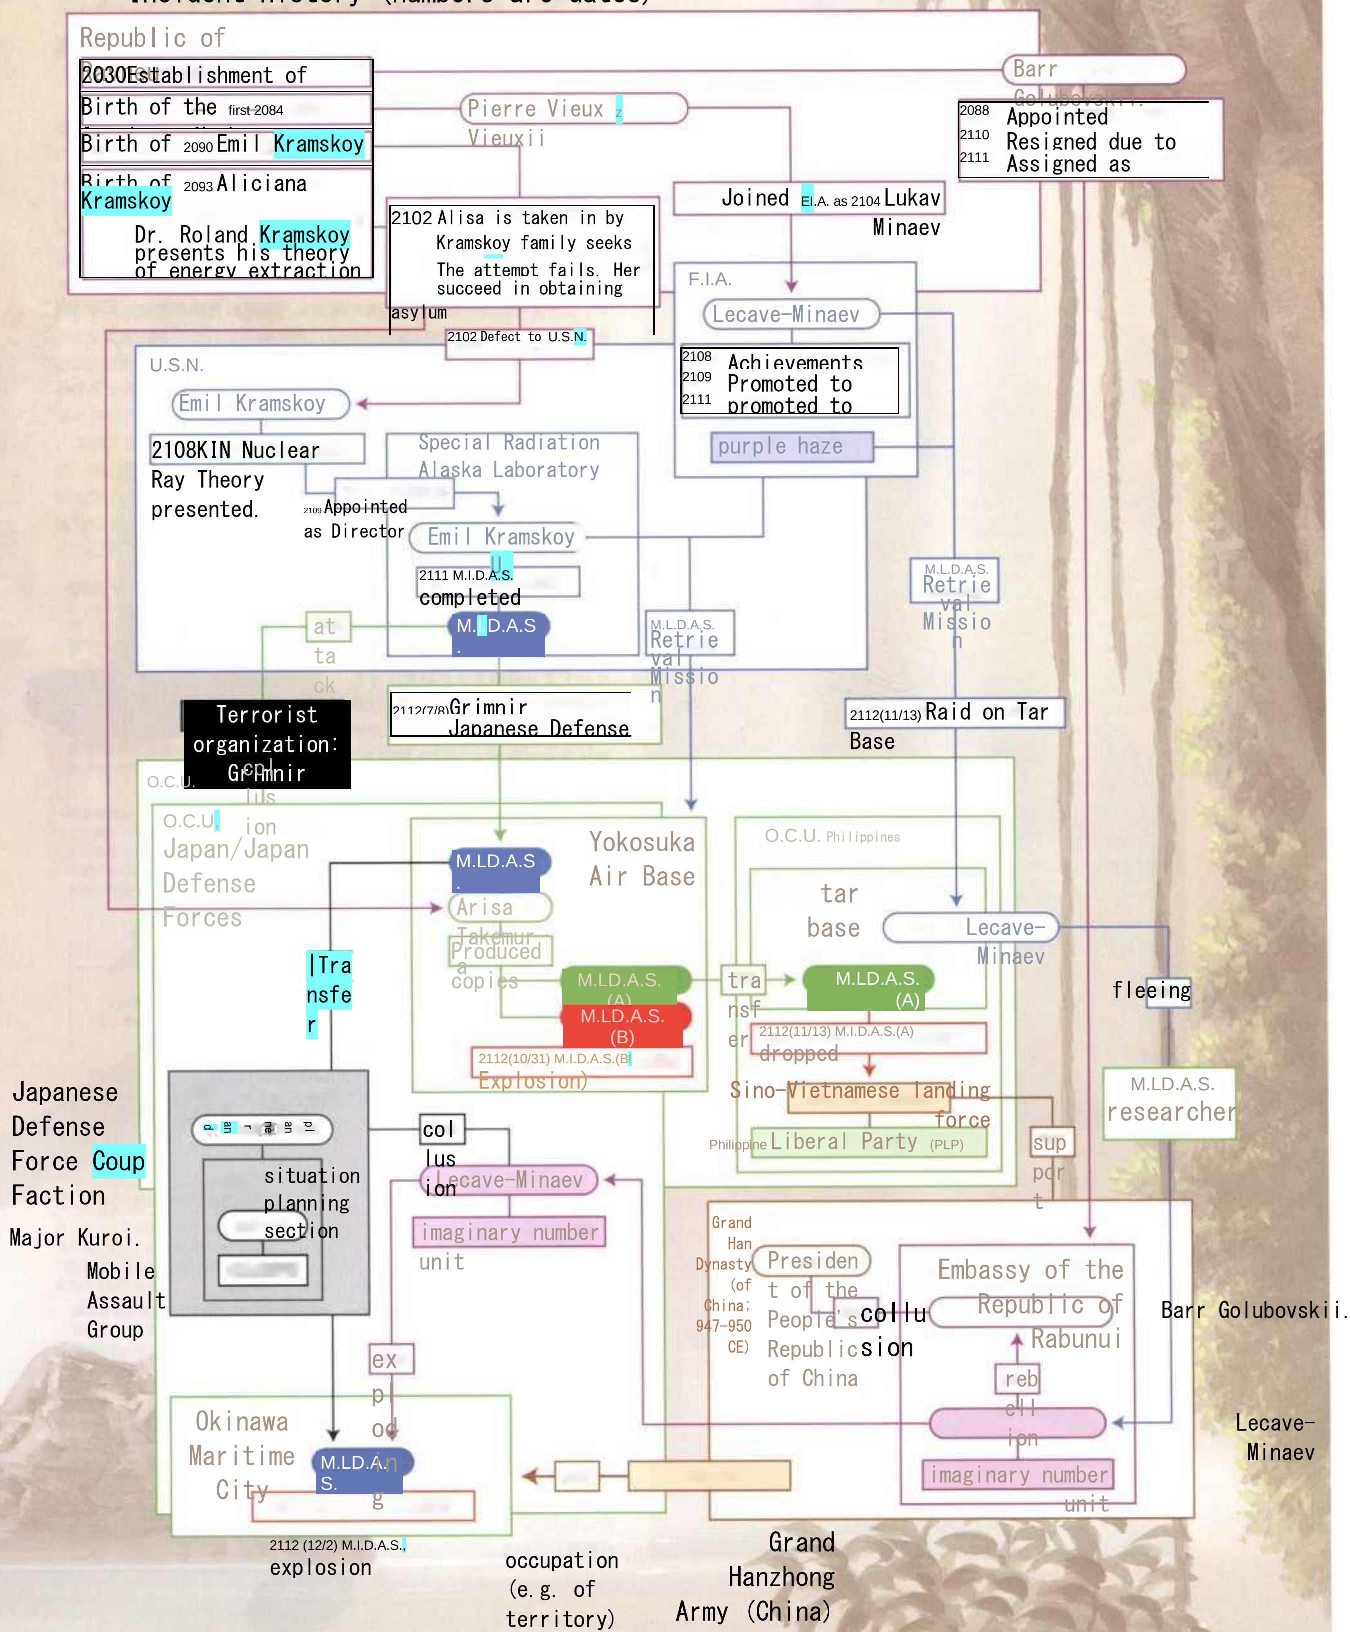

Philosophy of Human Revolution by Lecave

The conflicts and coup d'états in various regions related to the M.L.D.A.S. incident were caused by the political situation in each country, but the M.L.D.A.S. and Lukav played a catalytic role in the escalation of these conflicts and coups. Lukav planned to use M.L.D.A.S. as a means to control mankind through the imaginary numbers developed for the "superior race. The idea of suppressing or destroying others by force, while despising mankind as "inferior" and regarding oneself as a perfected being, is nothing but an imitation of the folly of "inferior" mankind, proving that in essence, imaginary numbers are no different from ordinary human beings.

Total population : approx. 470 million (2005 fiscal year)
Total area: 3897064 km^ 2 (2.62% of the world's total land area)

Outline

The history of European integration dates back to the Customs Union formed in **1948 by** Belgium, the Netherlands, and Luxembourg. The history of European integration dates back to the Customs Union formed in 1948 by Belgium, the Netherlands, and Luxembourg, followed by the **ECSC** (**European** Coal **and Steel** Community), which was formed by **six** powers including France, Italy, and the former West Germany to manage natural resources, **EURATOM** (European Atomic Energy Community) to jointly develop the nuclear industry, and the **ECC** (**European Economic Community). The** shortage of natural resources, which had been a concern for many years, has been largely resolved with the discovery of a new resource zone in Poland, which has enabled Poland to become completely self-sufficient in petroleum. The United Kingdom, which was outside the framework of these developments, launched the **EFTA** (**European Free Trade Association) with** Austria and **six** other countries in 1960 in response to the EEC, but withdrew in **1973** and joined the former **EC.**

The E.C. Allied Forces, the cornerstone of external security, is financed by contributions of troops from the armies of various countries and has a reasonable size, but it has long been pointed out that it is behind in **WAP** deployment and tactical research. The activities of Durandal, a new land-based tactical research institute established as a solution to this problem, are still in their early stages, and their future achievements are attracting attention.

E.C. Congressional Hall

History

1952	The European Coal-Steel Community (ECSC) is launched.
1958	The European Economic Community (EEC) and the European Atomic Energy Community (EURATOM) are launched.
1967.	ECSC, EEC and EURATOM decide to merge to form the new European Community (EC).
1993	With the increase in the number of member states, the European Union (EU) is established as a preparatory organization, seeking integration in areas other than the economy.
2005	Agreement on integration in all social areas such as economics, politics, divination, etc. E.C. (Euclidean Community) is established.
2025	E.C. Schnecke of Germany develops the first WAW (Wander Wagen) prototype.
2034	African conflict erupts; E.C. supports independent government of Zaingo.
2080.	Civil war breaks out in Estonia. In the same year, the Germans form Braunebel.
2096.	In the same year, the U.S.N. Spartans occupied Madira Island, threatening an all-out war.
2100	Republic of Serbia Enters Belgrade Civil War

The Congressional Committee on Foreign Relations (CFFR) is

The headquarters of the agency was located in the U.K. because of the large number of members, and because it was easier to obtain a consensus with less opposition from the military. In addition to contributions from the central government budget, The largest number is also in the United Kingdom.

The headquarters occupies an area of approximately 3,000 hectares, with a headquarters building, buildings for various research facilities, staff quarters, a 1,500-meter runway for transport aircraft, and several heliports. The entire agency has about 80 WAPs and their equipment (about 20 of which are in continuous operation), about 150 vehicles (mostly for transport and liaison), four V/STOL short-range jet transports, and several helicopters for liaison and transport.

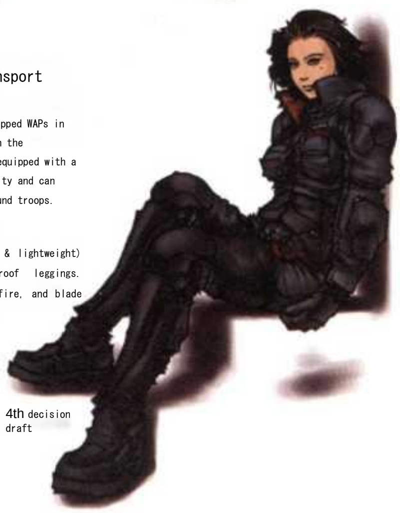

-Development Department" is a department that develops and improves WAP and its supporting equipment. Internally, the department is further divided into sections for each project. They develop not only the WAP itself, but also WAP weapons, special equipment, computer systems to control them, and a wide range of other items. In addition to the enhancement and improvement of existing WAP equipment, research and development of new equipment for the WAP is also a part of their work.
Tactics Research Department---The Tactics Research Department tests prototype WAPs and equipment produced by the Development Department, and conducts research on actual combat tactics using WAPs. The department also invites WAP units from various militaries to give presentations on tactics and equipment that have been validated through parallel comparisons by five research units. Although not yet adopted by the militaries, the research is gradually gaining recognition, and recently they have been invited to give presentations at military training camps in E.C. countries more often.
Medical Research Division -- Field data from the Huffman conflict report that WAP pilots are subjected to physical and psychological stresses that are different from those of existing land-based weapons. In reality, however, it has not been studied in depth by any national military. Durandal's Medical Research Department is the first institution in the world to specialize in this field, studying the effects of WAP piloting on the human body from various angles, including ergonomics, human physiology, and psychology.

4th decision draft

Durandal VIOL transport aircraft

It can carry six fully equipped WAPs in its cargo bay. Depending on the equipment, it can also be equipped with a full ground attack capability and can provide air support to ground troops.

English name:

-Constituents=>P.132-133

Niklas Glaser.
Rolf Wagner
Dominique Doranz

A special unit of the German Army that was established in the 2080s (the exact date is considered top secret). Its main mission is to suppress terrorists. In the 2090s, the unit's name (and existence) and mission became generally known, but the details of its headquarters and personnel are, of course, classified as important secrets. It is said that the WAP was deployed in the unit around 2089. At the same time, the introduction of WAPs by terrorist and extremist organizations around the world was becoming active, and Germany's quick response, ahead of other E.C. countries, was also a topic of discussion. However, despite the "publicity," the unit's equipment and videos of its operations were not disclosed to the general public. According to records, the unit is said to have conducted more than 10 anti-terrorist operations, but all of these operations were for the destruction of bases, and there seems to be no record of any hostage rescue operations. The reason why Braunebel was assigned to investigate the attack on the German base in 2096 was ostensibly due to his familiarity with special operations in the WAP, but in reality it was the result of the efforts of Brigadier General Glaeser to manipulate the military and the German parliament.

The Braunebel base is a repurposed old abandoned castle in the mountains of central Germany. The exterior of the castle and the surrounding topography have been preserved, making it difficult to distinguish the base from satellite photos, and the fortification is considered suitable for defense against external attack. The unit is equipped with about 50 WAPs, 20 combat helicopters, about 30 support combat vehicles (including ground and air batteries), a total of about 30 transport, liaison, and maintenance vehicles, and a total of about 10 transport and reconnaissance helicopters (all estimated). The number of personnel belonging to the unit is also estimated at around 90 (including mechanics, medics, etc.). Although the number of personnel is small in relation to the size of the equipment, many WAPs, vehicles, and helicopter pilots also serve as mechanics, so operations can be carried out without the need for specialized mechanics when only fighting WAPs.

4th preparatory draft

Outline

The "Bangkok Economic Belt," an economic community formed by the member countries of **ASEAN** (**Association of** Southeast **Asian** Nations), was originally established in **2006**, and the concept of a federation of nations based on this economic community had been in the works. The concept of a national federation based on this economic community was also in the works. However, due to a lack of "decisive steps" in terms of external negotiations and resources, coordination toward the realization of the concept was slow in progress. The name of the community was changed to the "**Oceania Community Union** (**O.C.U.**)" **in 2019, and after** reorganizing the political, financial, and military systems, as well as other details, a new national federation was declared to be established in **2026.** The proposal for the Union is that the Bangkok Economic Zone, Japan, and Australia will each have equal rights to the Union.

Although the creation of the Union has brought about great benefits to the member countries, such as economic stability, the internal situation is still chaotic, with a new conflict structure with the **U.S.N. and** unresolved ethnic issues within the Union.

O.C.U., Army Defense Forces

Organization: Allied O.C.U. Ground Defense Force　Appearance: 1ST, 2nd, 5th. FMO

Like the Navy and Air Force, it is an army organization, the predecessor of the O.C.U., the Joint Readiness Force, which was established in 2023 to contribute to the security of the coalition and world peace. The Ministry of Defense, which oversees the military, is located in Singapore, while General Headquarters, the center of corps command, is in Australia.

During the Second Huffman Conflict, the WAP Unit was organized within the 2nd Army Mobilization Division of the Army of Land Defense. This unit, headed by Captain Clive, formerly of the Army of the Defense Forces, contributed greatly to the victory of the O.C.U. on various fronts. However, after the end of the conflict, when the members learned of the true nature of the unit's efforts to secure and test B.D. materials, they deserted and joined Huffman's spirit, contributing to the search for the truth of the B.D. program.

Other WAPo compatible weapons developed by Intergaeen for remote guidance by fenrirs include the Mutos, the Zadok series WAP, and the ISV09A-S large mobile weapon.

Dark Geese (Strategic Studies Institute, Army Defense Forces, 1st Army)

-constituents=>P.104

Domingo Cayat, captain

Organization: O.C.U. Army and Defense Forces English: Dark Geese Appearance:2nd

The O.C.U. was a top-secret mercenary unit within the O.C.U. Army and Defense Forces, formed to carry out assassinations and other special operations. It is said to have been established in 2098 with the involvement of Secretary of Defense Perez Gabriel, but only a very limited number of senior officers were aware of its existence. The mercenary system was once abolished in the army due to the scandal of the desertion of the mercenary unit Canon Crow and the revelation of military secrets immediately after the end of the Second Huffman War (2090-91), but the formation of the Dark Geese seems to have been halfway enforced by a strict gag order.

During the 2012 Alor Desh coup d'état, Captain Cayatt, the commander of the POW Rescue Operations Command under Colonel Hodman, participated in the operation as a strategic consultant. While cooperating with the operation, he was assigned to assassinate those who were deeply involved in the "Fenrir Project" in order to prevent the leakage of the project's secrets.

Pang Chanjian (General Manager) Lisa-Stanley
Sayuri-Mitsuzuka

Jurisdictional group type:O.C.U. Land Defense Force
O.C.U. Ground Defense Force Intelligence Agency

The National Intelligence Agency (NIA) is an intelligence organization within the Army and Defense Forces that focuses on intelligence activities for the military and related organizations, both within and outside of the coalition. It is headquartered in Australia. During the Arroldesh coup d'état in 2102, two members were dispatched to the command post of the rescue operation of prisoners of war captured by the revolutionary forces under the direction of Major General Chan Jiang, the head of the department. In addition to participating in the operation, they also carried out their original mission of retrieving Fenrir, who had disappeared due to the chaos of the raid after being transferred to the Wehrmacht's Limian garrison base.

United States of New Continent

summary

Capital: Washington, D.C.
United States Department of Defense: Arlington, Virginia
Total population : Approximately 870 million people
Total area: 39938687W (26.82% of the world's total land area)

Outline

The capital is Washington, **D.C.** (a special district under the direct control of the federal government), the former capital of the United States. The process started with a **bilateral** fusion plan between the U.S. and Canada, which was followed by the gradual annexation of Latin American countries, mainly **NAFTA (North American Free** Trade Agreement) member countries, which was launched in **1994. In** the process, the U.S. implemented a series of tightening policies, such as aid cuts, etc., against Latin American countries that were already suffering from economic collapse at the time. (The participating countries withdrew from the United Nations.) Upon integration, the participating countries were reorganized as states and their right to self-government was guaranteed, but antagonism toward the federal government was strong, especially among the states whose economies had stagnated at the preannexation level, and the seeds of conflict were always being kept burning.

U.S.N. Army Organization:

U.S.N, Ministry of National Defense Appearances: 1ST, 5th, FMO, 2089
Organization: U.S.N. Army

U.S.N., the military organization under the Department of Defense (Pentagon: Washington, D.C.) and administered by the Department of the Army. It consists of four corps (division groups) of infantry, tanks, transport, and airborne, and various other units and agencies. The 64th Mobile Battle Group "Hell's Wall," one of the most famous WAP units in the General Army, is particularly well known.

Lynx Platoon (attached to the 334th Battalion, 112th Special Forces Company)

Organization: U.S.N. Army Appearances: 1ST
English character epithet: Silver Lynxes

A WAP unit formed within the 334th Battalion of the Army immediately after the outbreak of the Second Huffman Conflict. Its commander is 2nd Lieutenant Greenfield. He was given many important assignments by Colonel Stewart, the battalion commander, and contributed to the suppression of Freedom. At the end of the conflict, all members of the unit, including the captain, were detained for accusing the B.D. Project of conspiracy, and the unit was virtually disbanded.

Hal Fines' Howard Wong Gina

blackhound (Mustelus mustelus, houndshark found in the Eastern Atlantic)

Organization: U.S.N., Navy Appearances: 1ST
English character epithet: Black Hounds

A special forces unit belonging to the Navy (official name is the Navy's 4th Advancement Force). After the destruction of the "Freedom Star" in 2090, it was dispatched to Huffman Island, where it joined up after the conquest of Freedom City and participated in operations under the command of Brigadier General Winger. One theory is that he was involved in the B.D. Project, but there is no record of his testimony before a military court, so the details are unknown.

Hell's Wall (64th Mobile Squadron, Tank Division, Special Equipment Company')

Jurisdictional organization: U.S.N.Army Climbing work:1ST
English notation: HELUS WALL

The elite WAP unit is one of the most capable and accomplished in the entire army. Captain Demetrius, the unit's commander, was in charge of organizing the unit, and he personally scouted for the best pilots. The WAPs, painted in deep red all over, were always on the front line to serve as a "wall" to protect their comrades. In the Second Huffman Conflict, the WAP contributed to the control of Freedom, but in August 2091, it was destroyed in a battle when it intercepted the O.C.U.'s Freedom Recovery Operation Force at a frontline base near the city of Huffman.

5th decision draft
U.S.N - Military Regulars

The helmet is a distinctive feature (to encompass a visor, etc.), and is the equipment of a common soldier. A pistol on the left hip and a magazine pouch on the right hip. The rifle is supported by the right hand.

Strike - Wyverns

Organization with jurisdiction: U.S.N., Navy Climbing work: 5th

English notation: STRIKE WYVERNS

The WAP Regiment was formed to deploy forces to any part of the world at the earliest possible opportunity and to conduct assault and suppression operations from the strategic aircraft carrier USS Eclipse, which operated outside the normal framework of the fleet. At the time of the second conflict in Hachman, the regiment's commander was Major Wen Wright, who later became fleet commander and captain of the ECLIPSE.

Constituents=>P.147-148

Lynn Wenwright (Hon. Captain)
Edward Collins

Thomas Huber
He is a mid-level pilot with extensive combat experience. He is prone to gambling (he once spent his own platoon's operating funds on an arena), but his guts can sometimes be a source of encouragement.

Lilly-Four.
He is a former SEALS (a generic name for a part of the Special Warfare Group of the Sea Arm under the Special Operations Navy) pilot with a strong WAP. His rank is Lieutenant. He is very proud of his career, and is proud to talk about it.

Harvey Durant
His rank is second lieutenant. In addition to his natural physique, he trains hard every day, and his body is like steel. His colleagues say that his brain is like a muscle, perhaps because he has been over-weighted.

Julius Bancroft.
He is loved by everyone for his unique appearance and irresistible personality. His rank is lieutenant. He is an expert survivalist, and perhaps because of his experience, he has an unusual taste in food and often eats delicacies in the cafeteria.

Pat Fuentes.
He is a second lieutenant. Although not an active unit, he is in charge of information and paperwork related to operations as an assistant to the commander of the main unit. He provided precise support to Captain Walter, who took over after the Indochina Peninsula conflict.

David Lenchuk.
He is a second lieutenant. He is a very hardworking, hard-pressed man, who made his way up from the infantry to join an elite unit. Perhaps because of this, he is very respectful of the civility of the senior officer candidates around him, while behaving with no ill will.

Brian Lawson
Rank: Adjutant. He is an idealist with high aspirations. He is a man with a strong sense of justice, who sincerely wishes for "world peace" and has not the slightest hesitation in fighting for it. He hates political corruption that oppresses the people more than anything else.

Patrick Jin
He is of Oriental descent, and perhaps because of this, he is more patriotic than most. He is an excellent warrior, but at the time of the Indochina Peninsula conflict, he was at a loss to fight an ethnic group close to his own roots.

Bennett Harvey
Formerly an elite pilot in the DELTA (Delta Detachment, 1st Special Operations Division of the Army). His rank is 2nd Lieutenant. His tough mental toughness, even in emergency situations, is the result of his many special mission experiences.

Raymond Way
He is an adjutant-general. He has a stout build and silver-rimmed glasses that are somewhat disproportionate to his physique.

Although he is a realist in his approach to his work, he is serious and inflexible, and once he gets excited, he is unruly.

Jeff Zorn
He is a thoughtful intellectual with a good upbringing and a gentle manner. He is a thoughtful intellectual with a good upbringing and a gentle manner, but he also has a cynical side. He jokingly talks about his situation as a handyman and bitterly criticizes the higher-ups. When in battle, he turns into a martial fighter.

Susan.
She is the older sister of Eclipse Crew. Her rank is that of a lieutenant. She has a dainty and beautiful fighting style that is a reflection of her intelligence. She dismisses the intervention in the Cambodian and Laotian independence wars as a point scoring exercise for the current regime.

Tony -Gerlant.
His rank is lieutenant. He is witty and unique. He has been on the ship for a very long time and has spent most of his life at sea. He was called to the Caspian Sea terrorist attack while on vacation with his family for a barbecue, and he grumbled.

Robin Gauna
An honest mid-level pilot. His rank is Adjutant. His total WAP flying time is among the highest in the Strike Weavers, and his technique is top-notch. He has a longing for the special armored detachment "Barghest.

Phyllis Speer.
■"! His rank is adjutant. She is polite and kind. In a ship full of rough and tumble women, perhaps due to the tradition of the sailor MM, SHE HAS maintained her femininity. Some call her existence a miracle.

Laura Kimmel
She is a second lieutenant. She is a shy and fearless person (as many women are in the workplace), which causes her to get into trouble on a daily basis. Although her language is rough, she is a true-blooded person who appreciates and respects others based on their abilities.

Ralph Montgomery.
He is an adjutant. A former member of the Ranger Corps (a unit composed of infantrymen and pilots with special skills for undercover reconnaissance missions), he has a wealth of actual combat experience. He has extensive experience in actual combat. He demonstrates his advanced skills in close combat.

Gordon-Paulus
He was born and raised in a good family, but rebelled against his parents and left home to join the military. He was born and raised in a good family, but rebelled against his parents and left home to join the military. He is a lovable man with a natural and silly personality. He underwent survival training with Lieutenant Bancroft and became a gourmet survivalist.

Wat Turner.
He is a veteran pilot. He is a veteran pilot with the rank of adjutant. Perhaps because of his confidence based on his experience, his demeanor is always calm and composed. He has a high regard for Major Wenraith, who is the commander of the squadron at an exceptionally young age.

Burguest (Special Operations Forces (directly under SOCOM) Special Armored Detachment)

Competent Authority: U.S.N, Special Operations Command (SOCOM) Appearance: 5th, English notation: BARGHESTS

-Constituents=>P.148

Hector Reynolds, Captain

The "Anti-Terrorist" special forces group under the Special Operations Forces stands out among the special forces under the Special Operations Forces.

A specially formed team (under the jurisdiction of the Special Operations Army) that specializes in operational activities. The unit has achieved numerous accomplishments, including the terrorist attack on the Caspian Sea in 2095 and the attack on the Special Radiation Laboratory of Alaska in 2112.

In Alaska in 2112, we thwarted a terrorist plot, but failed to apprehend the man who had abandoned his substance.

Jill Andrews
He is a lieutenant. She has a well-trained and beautiful body, and is agile and precise in her work. She is truly a beastly warrior woman. However, in spite of her bravery, she is very afraid of Major Wenraith, a former burgher.

Lucas Hunter
A Type S convert. He is a lieutenant and a master of close combat. He is a master of close combat, and his highest aesthetic is "one-hit-kill," ensuring that his prey is killed. He is fed up with the unexpected amount of desk work he has to do.

bson
He is a lieutenant. He has a frivolous demeanor but his handling of firearms is artistic. He is a womanizer and has a weakness for beautiful women. He was a CQB (close quarter combat) partner of Major (then) Fenn in his verguest selection training.

Justin Derek
Type S convert. He is a lieutenant. He has served in a number of special units and was enlisted in the Burghtstadt because of his skills. He is usually a calm young man, but it is said that his bombardment in battle is as fierce as a storm.

Njonny Firth
Type S convert. Rank: Major. A living biography, he has served in many historical battles and is known for his work in the First Huffman Conflict. An analysis of Eclipse's electronic warfare equipment gave him a life expectancy of about a half a head of hair.

Luis Barcus
Type S convert. He is a captain. A skilled mechanic, it is said that no one can match him in repair techniques. He has excellent information analysis skills and sometimes reports on the situation at briefings.

Nathalie -Valles
Type S convert. His rank is Captain. In addition to his combat skills, he has extensive knowledge, especially in the field of electronics. He managed the arena when he was dispatched to Alaska.

Joshua McKee
Type S convert. Rank: Lieutenant. He was once an excellent sniper in a VIP assassination unit. Although his activities are shrouded in darkness, he may have been present on the backstage of history.

Muriel Fay
Type S convert. He is a lieutenant. He is a smart and skilled all-around player. He is a proven competitor, and is a master of electronic warfare due to his professional background. He tends to be a fan of high-performance electronic systems.

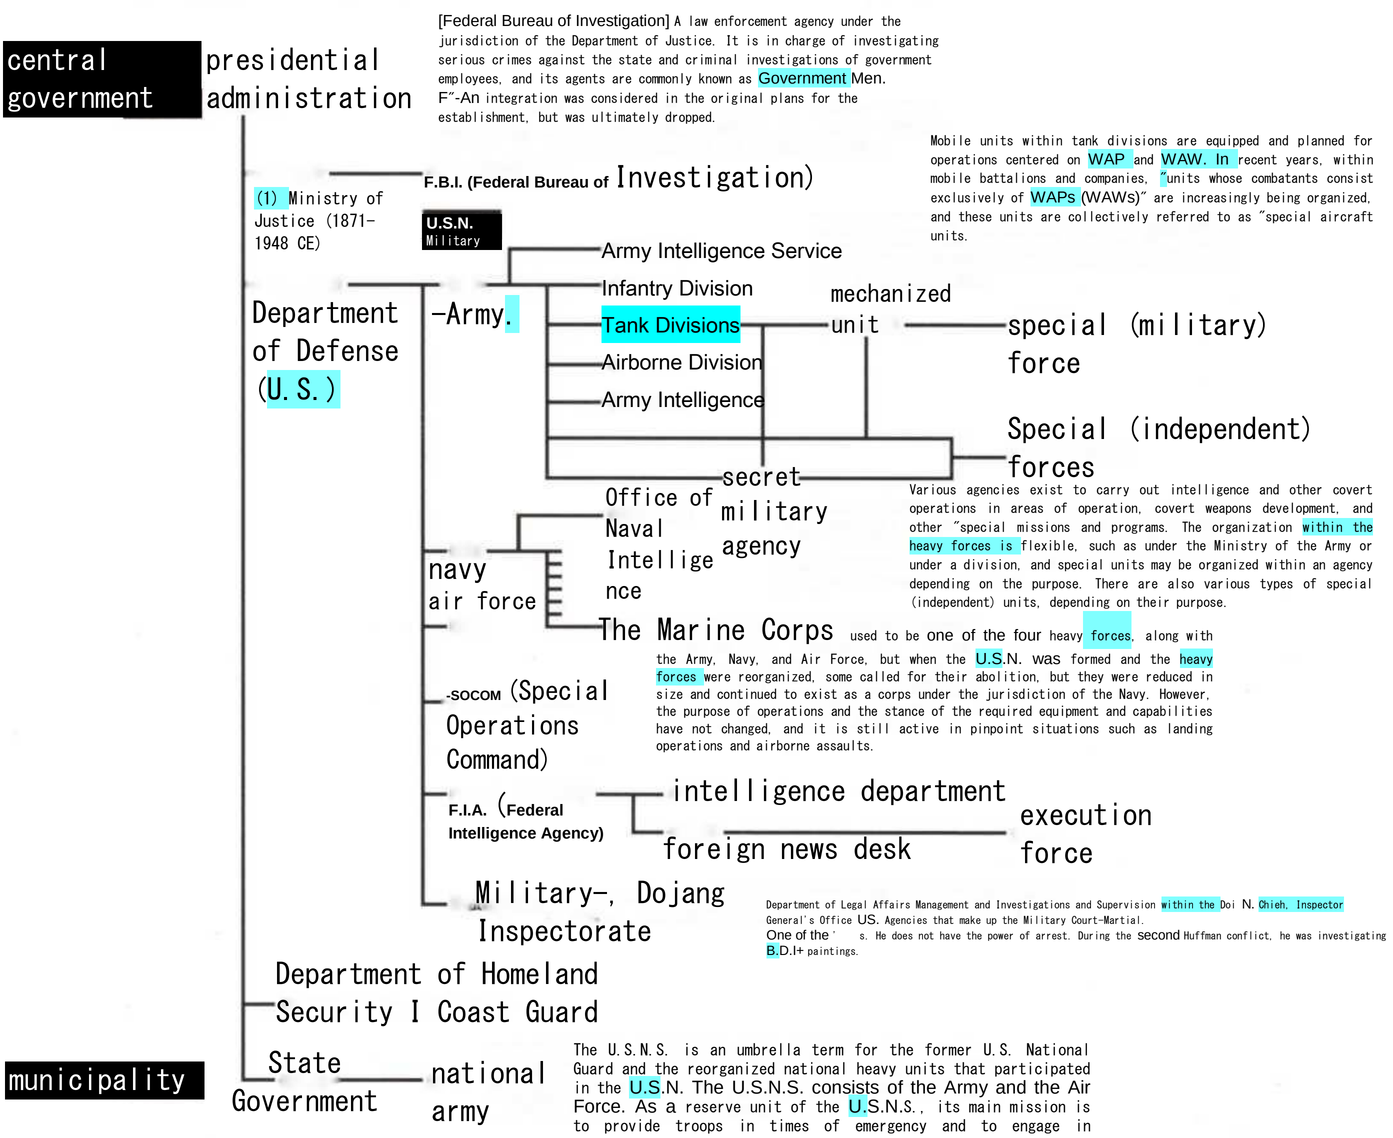

Michael Yang
His rank is Captain. He is a specialist in firearms and artillery. His destruction power is so great that everyone is said to be afraid of his gunfire. The first time he and Major Feng met was when they went undercover in Cambodia (after independence).

Henry Page.
He is a captain. He hates crookedness and has a single-minded personality. He is a serious person and hates crookedness. His way of life is reflected in his arm, and his accuracy in trajectory is divine. He asked Captain Goins for an explanation of the projectile and was told it was a magical beam.

Leila Roberts
Stype converter. He is a captain. very vindictive character andhunt down hisprey like a snake--- He was exposed in a date brawl during an investigation by Eclipse's electronic warfare equipment.

U.S.N-Organizational Chart

[Federal Bureau of Investigation] A law enforcement agency under the jurisdiction of the Department of Justice. It is in charge of investigating serious crimes against the state and criminal investigations of government employees, and its agents are commonly known as Government Men. F"-An integration was considered in the original plans for the establishment, but was ultimately dropped.

Mobile units within tank divisions are equipped and planned for operations centered on WAP and WAW. In recent years, within mobile battalions and companies, "units whose combatants consist exclusively of WAPs (WAWs)" are increasingly being organized, and these units are collectively referred to as "special aircraft units.

Various agencies exist to carry out intelligence and other covert operations in areas of operation, covert weapons development, and other "special missions and programs. The organization within the heavy forces is flexible, such as under the Ministry of the Army or under a division, and special units may be organized within an agency depending on the purpose. There are also various types of special (independent) units, depending on their purpose.

The Marine Corps used to be one of the four heavy forces, along with the Army, Navy, and Air Force, but when the U.S.N. was formed and the heavy forces were reorganized, some called for their abolition, but they were reduced in size and continued to exist as a corps under the jurisdiction of the Navy. However, the purpose of operations and the stance of the required equipment and capabilities have not changed, and it is still active in pinpoint situations such as landing operations and airborne assaults.

Department of Legal Affairs Management and Investigations and Supervision within the Doi N. Chieh, Inspector General's Office US. Agencies that make up the Military Court-Martial. One of the ' s. He does not have the power of arrest. During the second Huffman conflict, he was investigating B.D.I+ paintings.

The U.S.N.S. is an umbrella term for the former U.S. National Guard and the reorganized national heavy units that participated in the U.S.N. The U.S.N.S. consists of the Army and the Air Force. As a reserve unit of the U.S.N.S., its main mission is to provide troops in times of emergency and to engage in domestic security operations. Although the governor of each state retains command authority, in wartime they are incorporated into the Department of Defense and participate in operations under the command of their respective military units.

Republic of Zaftra

Republic of ZAFTRA

History

2015 [redacted]	CIS (Commonwealth of Independent States), led by Russia, becomes a state and the Republic of Zaftra is established.
2021	Republic of ZAFTRA establishes PMO (Permanent Peacekeeping Organization)
2070.	Outbreak of the First Huffman Conflict (all-out war between O.C.U. and U.S.N.)
2072.	First Huffman conflict ends (mediated by PMO)
2090	Outbreak of the 2nd Huffman Conflict (all-out war between O.C.U. and U.S.N.)
2091	Second Huffman conflict ends (mediated by PMO)
2094 [redacted]	ZAFTRA government refuses to admit its involvement in the Sakata Industrii case, and the president resigns.
2096. [redacted]	In the same year, ZAFTRA forces supported the independence movement of the U.S.N. government of Venezuela.
2108	Armed clashes erupt in Georgia.
2112.	Peace treaty signed with the Republic of Ravneu.

*Former CIS (Commonwealth of Independent States)
Russian Federation, Kazakhstan, Tajikistan, Uzbekistan, Kyrgyzstan, Ukraine, Belarus (now Rabunyi Republic), Moldova, Armenia, Azerbaijan, Georgia, Turkmenistan

Kamikie 4
Ren Brother Hsiao-State Security Service: Moscow
Capital: Moscow
Total population: Approx. 280 million sous (2015 fiscal year)
Total area: 22100843 km? (14.84% of the world's total land area)

Outline

After the collapse of the former Soviet Union in **December 1991, the CIS** (Common**wealth of** Independent States, headquartered in Minsk, the former capital of Belarus) was established by **12** powers, led by the Russian Federation. This loose federation of states continued for some time. However, with the beginning of the **21st** century, the **CIS** gradually lost its centripetal force, partly due to the launch of the **E.C. The** gap between the member states and Russia gradually became apparent, with delays in infrastructure development and the reemergence of problems related to the management of military facilities from the former federal period, and in **2015**, President Meldivsky of Russia announced the establishment of the CIS. In 2015, Russian President Meldivsky declared the establishment of a new state, the Republic of Zahutla, by persuading other countries to join him, using the abundant resources of Siberia as the centerpiece of an economic restructuring plan. The **two** countries of Belarus and Ukraine declined to participate in the new state. However, rumors persist that it is the "mastermind" behind various conflicts and incidents, including the **second** Yakhman War, and it is difficult to say that the country has earned the trust of the world.

Republican Guard of ZAFTRA

Competent organization: Ministry of Defense of the Republic of Zaftra Appearances: 4th, FMO
Russian: Armed Forces of Tomorrow

A huge military organization based on the organization and systems of the former Russian Federation Armed Forces, integrated and reorganized at the time of the establishment of the Republic. Its involvement in the B.D-plan and its military activities in E.C. and U.S.N. in 2096 are not clear.

Naval General Headquarters: Shanghai
Total population : Approximately 1.3 billion (fiscal year
Total area: 9602716 km^2 (6.45% of the world's total

Outline

In 2112, President Jie Boliao of the former People's Republic of China (PRC) proposed a change in the country's name in conjunction with a policy shift toward extreme socialism. China achieved rapid modernization through economic liberalization policies that began at the end of the **20th** century, and by the middle of the **21st** century it had become one of the world's leading superpowers. However, despite its rapid economic development, the gap between the rich and the poor in urban and rural areas has widened to an extraordinary degree. In addition, the country has long neglected environmental measures in favor of economic growth, and this has resulted in large-scale destruction of nature and environmental pollution, particularly in the rural areas of the country's urban areas and in the rural areas of the Yechi Zone. President Jie's policy change was expected to halt this negative spiral to some extent, but on the other hand, he also cut off the flow of democratization by eliminating and suppressing people and organizations that opposed his policies. In the same year, a large-scale rebellion was launched by the Hualien Dan, a rebel group that sought to overthrow the Jie regime, plunging Daehanjung into a period of turmoil.

3rd preparatory draft

Daikan Zhongjun Pilot Suit
A typical pilot's suit of the Daehan Chung Army. It consists of a jacket and a bottom like a pair of suspenders. It is very simplified, with no additional equipment such as armor.

Dahan Zhongjun Emergency Deployment Force Suit
This suit is constructed like a "pupa," but is made of the same material (100% cotton) as a standard pilot's suit. The addition of batting on the shoulders and elbows and the gloves give it a slightly "high-grade" appearance.

Armed Forces of the Central People's Republic of the Great Khan People's Republic

Central Military Commission of the Communist Party of China

-Constituent 0P.120

(The military arm of the party under the command of the President of the People's Republic of China. It has three armed forces (land, sea, and air), and in times of war, the People's Armed Police, which are organized by military districts of the army, are under its command. Although not strictly speaking a national army, it is externally and de facto
It is treated as a national army and is the world's largest standing army with a total of over 2.5 million troops (plus about 500,000 reservists, 1.5 million militiamen, and 6 million militiamen). Modernization of equipment has been a challenge, but in recent years the deployment of WAPs has been progressing and improvements are gradually being made.

Jae Boliao Kim Wi-wen
Liu No'yi Fung Joo Li-yin
Lan Shohua

Wu Long (dynasty of China, approx. 317-420 CE)

Organization: Desert Central Army (during employment) Appearances: 3rd
English Character Recognition: Wulong

A group of mercenaries of unknown nationality operating in various parts of the world. Formed in 2101. During the Great Hanzhong Civil War of 2112, they were hired by the Great Hanzhong Army, which was not fully trained in WAP combat.

-Constituents=>P.121~122

Rudolf Kaiser (captain) Hatari Kautilya
Rebecca Siddons (second in command)
Emilio Guthrie Gregory Hengel

Chinese guger tree (species of evergreen, Schima wallichii)

Opposing organization: Dahanzhong Government Ascending the mountain:3rd
English name: Noble Lotus

An anti-government organization that inherited the will of former President Bai Tae-Young (who died in 2112) and worked to overthrow the Jae administration, which promoted anti-liberal policies. It was formed by generals under the Pak administration with the support of activists, bureaucrats, and business people who supported the policies of the time, and publicly launched its activities as the Hualien Dan in 2112. In addition to its headquarters in Guangzhou, the Hua Lian Dan has branches in various parts of the country, as well as a base in Hong Kong for contacting overseas supporters and gathering information.

Juan-Moghchon, Commander
Luo Cheng, Deputy Commander
Zhang Youning, Fuzhou Branch Manager
Lynn Chaohua
Lynn-Woben.

Yukou Yuijian
He is a legendary kung-fu master of several schools of kung-fu and an honorary combat advisor to the group. In the ring, there is no one who can compare to him in the whole of the Great Desert, let alone the group. It is said that his special blow will make even the WAP succumb to him.

Minh-Kho-Wang. He was the son of Ming Huang-ju, the former vice minister of state who died in a plane crash in 2104. The emergence of the memory of the vice minister who supported the democratic line has given the Hwarengeum a boost for its large-scale march.

action
He is in charge of the Xiamen branch that took custody of Ivan Lazarev, Imaginary Number Sample, who escaped from the Shanghai Institute (an overseas branch of the Rabunui State Scientific Research Institute). He is a bit rude.

Joung-Seong Yang
He was once a division commander of the Changqiang Army's Southern Area Army's augmented engineer division. He was once a division commander of the Changqiang Army's Southern Area Army's augmented engineer division. He joined Commander Huang and his comrades to build the foundation of a real combat unit.

Jou Lien Hoa
He is the commander of the 2nd Army, the key component of aerial mobility. He was an excellent pilot who graduated from the Air Cadet Academy and was appointed as a lieutenant in the Changqiang Army. Unable to put up with the current administration's disregard for the people, he joins the Hwarang Army with his subordinates.

Suu-Shuessen.
She is a member of the 2nd Army and a subordinate of Commander Jou. She was one of the subordinates that the military commander brought with him when he deserted from the Dahanzhong Army and joined the Hualien Group, and their relationship has not changed.

Hatta Mirza.
A member of a band of thieves that supports the Hualien group and engages in bandit-like activities around Taiwan and elsewhere. They sometimes deviated from their original goal of anti-government activities and caused trouble by attacking non-Great Hanzhong forces.

The Janggwangjun is organized and deployed in seven military regions of the country, and is responsible for the defense of the military region for which it is responsible. Its unit structure and equipment are very standard army ones, and more than 90% of its soldiers are militiamen under the conscription system. It is estimated that the total number of troops is 4.5 million and the number of war vehicles is approximately 1,300.

Rapid Reaction Force...a force composed of airborne equipment and infantry, whose operational actions are always based on the airlift of men and equipment.
The Corps shall be The corps' primary mission is to be the first to arrive on the scene of a border
These include the suppression of ethnic rebellions and political uprisings in the country.

Rapid Deployment Force - ... literally, a unit "in charge of operations requiring urgent attention".
Equipment is not for airborne, but heavy warfare
It includes fighting vehicles. Its primary role in the operation is to provide support and attack from
The goal is to contribute to the destruction of the city.

Rapid Reaction Force -- ...a special unit composed of elite soldiers of the Army, composed of WAPs and special infantry.
The team will be equipped and capable of arriving anywhere in the country within six hours to begin
Unlike other armies and units, the equipment is outfitted with state-of-the-art equipment that is classified as critical.

Large nuclear-powered submarine "Goh" class of the Dahan Central Navy

She is 140 m long, 25 m wide, and 20 m high, and has a displacement of 11,3001 (8,6001 on the water). z She is equipped with two pressurized water reactors and can achieve 53,000 hp (shaft horsepower) and a top speed of 35 knots (64.82 knVh). Armament consists of four 400cm tactical-class nuclear torpedoes and four 533mm conventional torpedo tubes at the front of the ship. The upper structure was originally a VLS (Vertical Launching System), but now functions only as a deployable hatch. It belongs to Shanghai Naval Base, but is not listed in the deployment list on the network forum, probably because it is classified.

summary

Headquarters: Addis Ababa (Ethiopia) Integration Committee: same as above
Total population : approx. 800 million (FY2034)
Total area: 29797500 t2 (20% of the world's total land area)

Outline

The OAU, which had all the countries of the region except Morocco as members, was active with a view to establishing a parliament and integrating currencies in the future, but later on, individual national federations were formed based on economic cooperation with neighboring countries in each region. In the 21st century, the OAU virtually collapsed due to the new E.C. and other changes in the international community, and in 2030, the O.A.C. was established at the proposal of the U.N.A.S. and a new joint national plan was announced. However, this plan was put on hold when a civil war in C.A. in 2034 led to a conflict that almost resulted in an all-out war. The conflict was eventually brought to an end through direct dialogue between U.N.A.S. and W.A. representatives, but clashes have continued to erupt in various parts of the country since then, and the road to unification still seems to be a long one.
